Word Work Grid

Complete each of the activities in this grid. Write the date you completed each activity on the line provided.

<p>Syllable Sort Write your spelling words in order from the least amount of syllables to the most. Words with the same number of syllables should be in alphabetical order.</p> <p>Date: _____</p>	<p>Odd One Out For each of your spelling words, write four words. One is your spelling word, two relate to your spelling word and one is the odd word out that doesn't fit with the other two.</p> <p>Date: _____</p>	<p>Wacky Words On a sheet of paper, write your spelling words in different directions, filling up the whole sheet. Use different colours and types of writing for each word.</p> <p>Date: _____</p>	<p>Word Detective Write three clues about each of your spelling words. Ask someone to try to guess your spelling words using your clues.</p> <p>Date: _____</p>	<p>Digging in the Dictionary Use a dictionary to find the definition and write a sentence for each of your spelling words.</p> <p>Date: _____</p>
<p>Rhyming Wheels Think of as many words as you can that rhyme with your spelling words.</p> <p>Date: _____</p>	<p>Alliteration Write a sentence for each of your spelling words using as much alliteration as possible.</p> <p>Date: _____</p>	<p>Sentence Smart Write a sentence for each of your spelling words.</p> <p>Date: _____</p>	<p>Story Time Write a story using as many of your spelling words as you can. Underline each of your spelling words.</p> <p>Date: _____</p>	<p>Sort Them Out Sort the words on your spelling list into three different categories of your choice.</p> <p>Date: _____</p>
<p>Word Search Create your own word search using all the words on your spelling list.</p> <p>Date: _____</p>	<p>Handwriting Hero Write out your spelling words in your very best cursive hand writing.</p> <p>Date: _____</p>	<p>Letter Lingo Write a letter to a friend. Use as many spelling words in your letter as you can.</p> <p>Date: _____</p>	<p>Words Within Words Make a list of as many smaller words as you can find from your spelling list.</p> <p>Date: _____</p>	<p>Code Breaker Use the code guide to make a code for each of your spelling words.</p> <p>Date: _____</p>

Writing an extended metaphor poem

The poem 'Artist Moon' uses an extended metaphor to compare the Moon to an artist. Write your own poem based on 'Artist Moon' that uses a new extended metaphor to describe the Moon. Start by working through the questions below.

1. In 'Artist Moon', the Moon is compared to an artist who changes the way things look. Brainstorm some other professions that create a piece of work. Some ideas have been provided.

chef	musician	designer	hairstresser
------	----------	----------	--------------

2. Which profession from the above list do you like the most? Now think about what it will help the Moon to create. Write a brief description.

3. Describe what you see when the Moon makes its creation.

4. List any key words you could use in your poem that are related to your metaphor. For example, in 'Artist Moon,' the key words used are painting and night.

5. Use your ideas to draft your poem on a separate sheet of paper. Use the form and structure of 'Artist Moon' as your framework. Don't forget to give your poem a title.

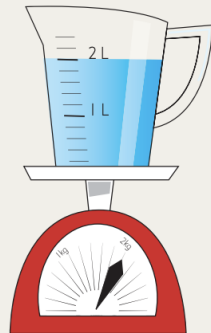

MG2 Capacity, volume and mass

Capacity, volume and mass are related.

One millilitre of water has a volume of one cubic centimetre and a mass of one gram. Look carefully at the chart below to see other relationships.

Capacity (water)	Volume	Mass
1 mL	1 cm ³	1 g
10 mL	10 cm ³	10 g
100 mL	100 cm ³	100 g
200 mL	200 cm ³	200 g
300 mL	300 cm ³	300 g
400 mL	400 cm ³	400 g
500 mL	500 cm ³	500 g
600 mL	600 cm ³	600 g
700 mL	700 cm ³	700 g
800 mL	800 cm ³	800 g
900 mL	900 cm ³	900 g
1 Litre (1 L)	1000 cm ³	1 kilogram (1 kg)
10 L	10 000 cm ³	10 kg

Language reminder

Capacity: the amount a container can hold (use mL, L).

Volume: the amount of space a 3D shape occupies (use cm³, m³).

Mass: the amount of matter an object contains (use mg, g, kg, t).

Try this

1 Write the related capacity, volume or mass.

- The water in a one litre bottle has a mass of one kilogram. What is the volume of the bottle?
- What is the mass of the water in a full 10 litre bucket?
- Water from a full flask has a mass of 600 g. What is the capacity of the flask?
- What is the capacity of a bucket that can hold 9 kg of water?
- How heavy is the water in a 2 L bottle?

2 Complete the table showing the relationship between capacity, volume and mass of water.

Capacity (water)	Volume	Mass
a	100 cm ³	100 g
b	250 mL	250 cm ³
c	300 mL	300 g
d	500 mL	500 cm ³
e	760 mL	760 cm ³
f	1000 cm ³	1 kg
g	2 L	2 kg
h	25 000 cm ³	25 kg
i	60 L	60 000 cm ³
j	3500 cm ³	3.5 kg

Topic MG2

3 Write the corresponding volume, mass and capacity of these liquids.

Volume:
Mass:
Capacity:

Challenge

A body of water: Scientists have worked out that humans are mostly water, about 70% in fact. That's $\frac{7}{10}$ of your mass made up of water. How much of your mass in kilograms is water?

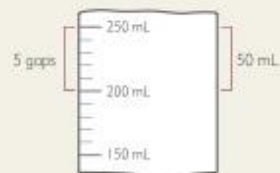

MG3 Graduated scales

On a graduated scale there are times when not all of the graduations are numbered. To work out the value of each graduation, count the gaps between the numbered graduations, then divide.

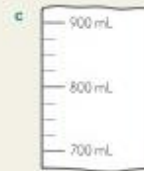

50 mL ÷ 5 gaps, so each graduation is 10 mL.

Try this

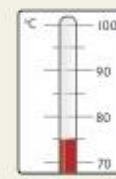

1 Work out the value of each graduation and label the scale completely.

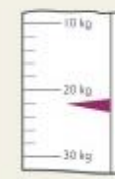

2 Work out the value of each graduation to help you write the measure shown on these scales.

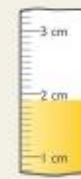

a mL

b °C

c kg

d cm

e km/h

f g

g s

Challenge

More accurate: These two measuring cylinders were used to measure the dose of medicine for a child. Which one would give a more accurate measurement? Why?

NA19 Decimal addition to hundredths

When adding decimal fractions it is important to keep the decimal points lined up. This will help you add the ones, tenths and hundredths in their correct columns.

$$\begin{array}{r} 6.21 \\ 0.54 \\ + 1.3 \\ \hline \end{array} \rightarrow \begin{array}{r} 6.21 \\ 0.54 \\ + 1.30 \\ \hline 8.05 \end{array}$$

Tip

Fill the empty places with zeros. This keeps the digits lined up.

To make sure your answer is reasonable, estimate your answer by rounding to the nearest whole number and add. You can usually do this mentally.

$$\begin{array}{r} 6.21 \text{ round down} \\ 0.54 \text{ round up} \\ + 1.3 \text{ round down} \\ \hline 8 \end{array} \rightarrow \begin{array}{r} 6 \\ 1 \\ + 1 \\ \hline 8 \end{array} \text{ (estimate)}$$

You can also use a calculator to check your answer.

Try this

1 Estimate, then write each sum vertically and add.

a $7.05 + 1.3 + 8.14$

(estimate)

b $3.02 + 0.5 + 4.19$

(estimate)

c $22.43 + 17.09$

(estimate)

d $9.47 + 9.47$

(estimate)

e $0.8 + 1.5 + 0.4$

(estimate)

f $2.02 + 0.2 + 20$

(estimate)

g $9.9 + 9.09 + 9.99$

(estimate)

h $0.5 + 5 + 5.5$

(estimate)

What can cut down on homework pollution?

2 Solve the additions, then write the letter that matches each answer in the boxes below.

$67.23 + 0.42 + 2.07$

(A)

$7.17 + 7.28 + 7.1$

(I)

$7.52 + 1.83 + 0.04$

(U)

$0.1 + 1.1 + 0.01$

(C)

$7.3 + 3.7$

(S)

$508.15 + 281.22$

(D)

$0.48 + 0.66 + 0.74$

(N)

$7.08 + 7.06$

(P)

$32.03 + 1.2 + 0.1$

(E)

$5.55 + 5.5$

(L)

9.39	1.88	11.05	33.33	69.72	789.37	33.33	789.37

14.14	33.33	1.88	1.21	21.55	11.05	11

3 Our relay teams ran in the 4 x 100 m at the District Athletics Championships. Each competitor's time for their leg of the race is recorded below. What was the total time for each race?

Boys 4 x 100 m relay times

Ben	15.01 s
Ethan	13.12 s
Austin	14.5 s
Harper	14.22 s

Girls 4 x 100 m relay times

Olivia	14.48 s
Ella	13.56 s
Amber	16.28 s
Harmony	14.77 s

Challenge

Dream team: Choose the fastest four from the eight boys and girls above to make a mixed relay team. What would their 4 x 100 m time be?

NA21 Decimal subtraction to hundredths

When you subtract decimal fractions, remember to keep the decimal points lined up vertically. This will make sure that you subtract the ones, tenths and hundredths in their correct columns.

$$\begin{array}{r} 86.46 \\ - 25.7 \\ \hline \end{array} \rightarrow \begin{array}{r} 514 \\ 86.46 \\ - 25.70 \\ \hline 60.76 \end{array}$$

Tip

Fill the empty places with zeros. This also keeps the digits lined up.

To make sure your answer is reasonable, estimate your answer by rounding to the nearest whole number and subtract. You can usually do this mentally.

$$\begin{array}{r} 86.46 \text{ round down} \\ - 25.70 \text{ round up} \\ \hline \end{array} \rightarrow \begin{array}{r} 86 \\ - 26 \\ \hline 60 \text{ (estimate)} \end{array}$$

You can also use a calculator to check your answer.

Try this

1 Estimate, then write each subtraction vertically and subtract.

a $56.41 - 3.29$

(estimate)

b $77.25 - 72.6$

(estimate)

c $22.43 - 17.09$

(estimate)

d $16.7 - 11.46$

(estimate)

e $9.9 - 9.47$

(estimate)

f $518.41 - 8.41$

(estimate)

2 The table shows the life expectancy at birth from ten countries around the world. Work out the difference in life expectancy of the children born in the following pairs of countries.

a Monaco and Australia

b Australia and USA

c Australia and Chad

d China and India

e Australia and South Africa

f Monaco and Chad

Life expectancy at birth		
Rank	Country	Years
1	Monaco	89.52
2	Japan	84.74
13	Australia	82.15
43	USA	79.68
99	China	75.41
153	Russia	70.47
163	India	68.13
191	South Africa	62.34
222	Afghanistan	50.87
224	Chad	49.81

Source: The World Factbook.

3 Use the Boys 4 x 100 m relay times on page 69 to answer these questions.

a Who ran faster, Ethan or Harper?

What is the difference between their times?

b Who ran faster, Ben or Austin?

What is the difference between their times?

4 Use the Girls 4 x 100 m relay times on page 69 to answer these questions.

a Sort the four competitor times from fastest to slowest.

b What is the difference between the time of the fastest girl in the relay team and slowest?

Challenge

What was the question? The answer to a decimal subtraction is 9.09. Write three possible questions that would give this answer.

What countries are there on the continent of Asia?

- 1** Colour and label each of the continents on the world map below. Add in the North Point, a legend and a title for the map.

Legend

Asia is the largest continent in the world, covering approximately thirty percent of the earth's surface. Asia has the greatest population of all the continents. Over four billion people across more than forty countries live here. Asia has a variety of geographical features including mountains, plateaus, plains and deserts as well as freshwater and saltwater environments.

- 2** Write down the names of any Asian countries you have heard of or have visited.

- 3** Use the detective cards below to race your way around Asia.

Working in pairs, read the clues on each card to work out which Asian country it relates to. Find this country on the map of Asia on the following page. Label and colour this country.

Forty five billion
pairs of chopsticks
made each year.

Black sand desert

An island.
Sits on the
80 degrees east
longitude line.

An archipelago.
Four main islands.
More than 6,000
small islands.

Flag features
a crescent
and a star.

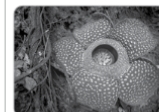

Tallest building
in the world.

No chewing gum.

Hills made
of chocolate.

Has the
most rivers
in the world.

Bengal tiger

Longest
capital city name
in the world.

- 4 Look at the list of Asian countries below. Use an atlas to help you find one country from each region and then colour and label it on the map.

Countries of Asia

North-east	South-east	South	Central	West		
China	Brunei	Afghanistan	Kazakhstan	Armenia		
Japan	Cambodia	Bangladesh	Kyrgyzstan	Azerbaijan		
Mongolia	Timor-Leste	Bhutan	Tajikistan	Bahrain		
North Korea	Indonesia	India	Turkmenistan	Cyprus		
South Korea	Laos	Iran	Uzbekistan	Georgia		
Taiwan	Malaysia	Maldives		Iraq		
Russia	Myanmar	Nepal		Israel	Palestine	Turkey
	Philippines	Pakistan		Jordan	Qatar	United
	Singapore	Sri Lanka		Kuwait	Saudia	Arab
	Thailand			Lebanon	Arabia	Emerites
	Vietnam			Oman	Syria	Yemen

- 5 Find some interesting facts about four countries in Asia and make detective cards for them. Share your card clues with a partner and see how quickly they can find the matching countries.

6

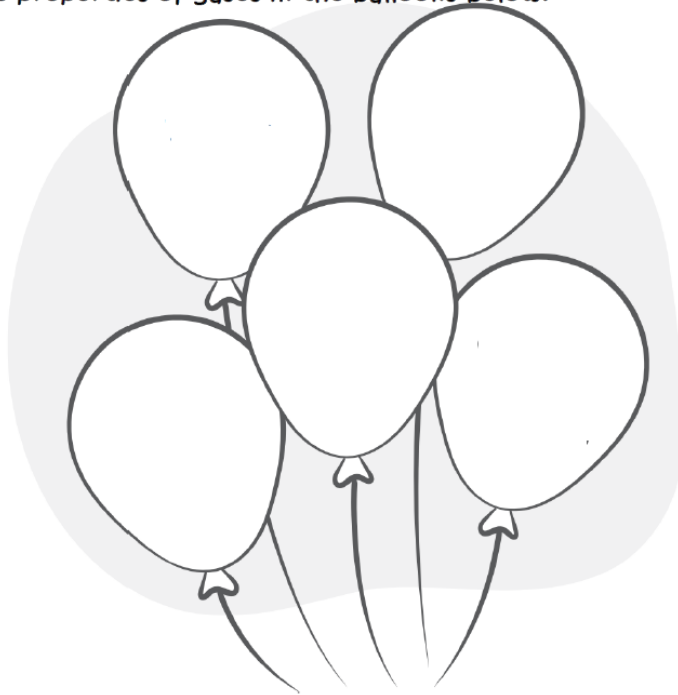

- a** Open Google Earth and find the Early Connectors section. (To do this, Select the Voyager icon then select Education, then scroll down to Explorers: Early Connectors).
Choose either Marco Polo, Ibn Battuta or Zheng He. Follow and investigate their exploration of parts of Asia.
- b** Make your own fact file about their journey. Include geographical features and places they came across along the way.

Gases Matter

The Properties of Gases

Air is a mixture of gases, mostly nitrogen and oxygen. Like solids and liquids, gases are matter. We can identify gases by their properties and their behaviour.

List the properties of gases in the balloons below.

INVESTIGATION QUESTION 5

Waterproof Paper

Each group will need:

- 1 clear plastic cup
- tissue or a piece of paper towel
- sticky tape
- 1 large, deep bowl full of water (preferably clear)

5

Investigation: Waterproof Paper

Step 1: Collect the materials listed on page 1

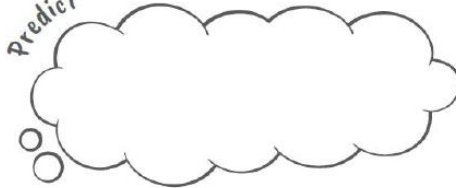

Step 2: Scrunch up the tissue/paper towel and wedge it into the bottom of the cup. You could use a small amount of tape to hold it in place.

Step 3: Hold the cup upside down over the water.

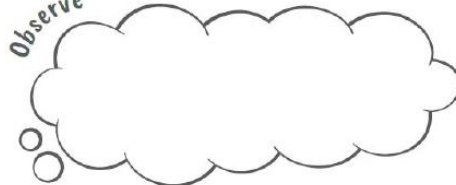

What will happen to the paper if you lower the cup down into the water? Write your **prediction**.

Predict

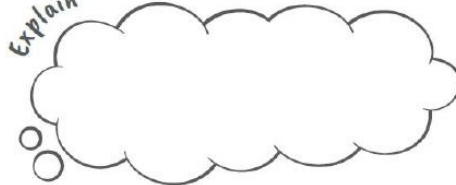

Step 4: Lower it quickly down to the bottom of the bowl. What happens to the paper? Write your **observation**.

Observe

Step 5: Lift the cup straight up out of the water. Dry around the edge, then feel the paper. Write an **explanation** for what you observed and felt.

Explain

What property of gases does this investigation demonstrate?

Step 6: Repeat steps 3–5. Holding the cup at the bottom, tilt it by lifting up one side until you hear a sound. What makes that sound? Discuss some ideas with a partner.

Experiment in a bag

INVESTIGATION QUESTION 6

A Gas Bag

You will need:

- 1 small ziplock bag (snack size)
- 1 cup of vinegar
- baking soda
- 1 teaspoon

- Read the instructions carefully before conducting the experiment.
- Write down what you predict will happen (hypothesis).
- Record all data: times, photos, video, etc.
- Write a detailed conclusion to explain the results – you may need to do some research.

Gas in a Bag Experiment

Aim

Will water temperature affect how fast the bag inflates?

Equipment

- One small (sandwich size) zip-lock bag
- Bicarbonate of soda
- Warm water, tap water, cold water
- Vinegar
- Measuring cup
- A tissue

Method

1. Put 1/4 cup of very cold, tap or very warm water into the bag.
2. Add 1/2 cup of vinegar to the water in the bag.
3. Put 3 teaspoons of bicarbonate of soda into the middle of the tissue.
4. Wrap the bicarbonate of soda up in the tissue by folding the tissue around it.
5. You will have to work fast now - partially zip the bag closed but leave enough space to add the bicarbonate of soda packet. Put the tissue with the bicarbonate of soda into the bag and quickly zip the bag completely closed. Start your timer as soon as the bag is zipped.
6. Put the bag down on the ground (outside) and step back. The bag will start to expand, and expand, and if all goes well...POP!

A fair test

Controls

Variable

Hypothesis (predict what you think will happen)

Results - data /observations (photos)

Conclusion
